

A NEW DIMENSION
OF YOUR TRAVEL EXPERIENCE

New quality of travel

SmartVan is a functional and exceptionally comfortable interior furnishing system fit for all vans. Thanks to the multitude of ingenious solutions, SmartVan is a product that will revolutionise your way of looking at travel. Forget about the boring and uncomfortable space, or the permanent lack of room for everything you want to take along. Discover SmartVan and try out a completely new dimension of travel.

Unmatched passenger area solutions

SmartVan offers a fully equipped stylish passenger area made up of three comfortable upholstered seats, a considerable amount of storage space, two beds, and kitchen and multimedia equipment. In addition, SmartVan has been fitted with USB plug sockets and 230V sockets all over the vehicle, which will make the charging of your devices a lot easier and quicker.

- ✓ 3 comfortable upholstered seats
- ✓ fully equipped kitchen
- ✓ 2 beds
- ✓ storage area
- ✓ lighting
- ✓ multimedia equipment

We are what we cook

In SmartVan you'll make and store your food in a secure and convenient way. The interior furnishing consists of a variety of appliances, including a fridge, a microwave, and a special spot for installing a gas cooker.

Everything right where it belongs

The passenger compartment of SmartVan has been used to its maximum advantage. From now on, you don't have to worry about finding the right place for your hand luggage, as SmartVan has a countless number of drawers, shelves or boxes to ensure that everything is close at hand.

A farewell to boredom

SmartVan has been fitted with a television, a sound system and a set of headphones built into the side walls. Additionally, right next to the tv there is a special area to connect a variety of multimedia devices through HDMI. A set like this will surely make your journey a lot more attractive, and it will help you to fight boredom during a stopover.

Customisation first

SmartVan offers an array of customised solutions for your interior, like e.g. an individual logo placed on the headrests.

Time for relaxation

SmartVan offers two cosy sleeping areas. In the rear section above the seats is a full-sized 2 x 1.4 metre wide bed with an independent lighting system and amplifiers, and a fitted ladder. The other bed is placed in the bottom area and comes in the form of drawers found below the seats.

The image shows the interior of a vehicle, specifically the front seats and dashboard area. The seats are upholstered in black leather with white stitching and a quilted pattern on the backrests. The dashboard and steering wheel are also visible, featuring a modern, sleek design. The overall aesthetic is one of luxury and comfort.

Luxury cockpit

SmartVan has not forgotten about the driver's area, where the seats have been stylishly trimmed, which will surely make a journey a lot more enjoyable. The rotating swivel base of the passenger seat is truly a game changer for increasing comfort and convenience.

The driver's area has additionally been enhanced with an easily foldable table placed between the seats which has, among others, two drawers, drink bottle holders, a holder for a smartphone and other accessories.

Smart load space

The load space has been designed very thoughtfully. All the fitting handles, hooks, shelves or safety nets will help you to load and safely transport your stuff. This area also has ceiling lights and an additional safety tool in the form of a riffled plate, as well as a specially extended rubber mat, which will protect your rear bumper against possible damage throughout reloading.

In addition, expect to find a shower cubicle made of black fabric, which is pulled out from the side wall.
